

Statewide Health Information Exchange

- Core components of the KHIE include: a master patient/person index; record locator service; security; provider/user authentication; logging and audits; clinical messages and alerts. The system includes patient demographics, lab results, radiology and transcription reports, historical patient diagnoses, medications, procedures, dates of services, hospital stays, reporting to the state immunization and cancer registries, reporting of syndromic surveillance data and reportable labs/diseases. KHIE also offers a community record (virtual health record) for care coordination.
- First pilot hospital was connected in April 2010
- Statewide rollout began in January 2011. Pilot participants included 6 hospitals and one clinic

KHIE Connectivity Options and Available Data

- The patient clinical record is available through the Community Record or Continuity of Care Document (CCD)
 - The Community Record uses edge servers connected via a Virtual Private Network (VPN) for connectivity
 - The CCD uses web services for connectivity
- KHIE is seeded with four years of Medicaid claims data

Implementation Seed Capital

- Medicaid Transformation Grant (MTG)
- HHS Office of the National Coordinator (ONC) State HIE Cooperative Agreement Program

Participants

- 575 Signed Participation Agreements (Represents 2,093 Locations)
- As of June 27, 2014 KHIE had a total of 830 provider locations submitting live data and actively exchanging information. 80% of the hospitals are live on KHIE. (See map below)

Others:
• Kentucky Immunization Registry
• State Lab (Microbiology) (Franklin)
• Grundy, VA
• Hamilton, OH
• Indiana
• Pennycuik Behavioral Health Ctr
